VOLUME VII

INDEX OF SUBJECTS AND AUTHORS

Only main topics are listed, and reference is given to the first page of each paper in which they are discussed

Acridines
  mutants of *E. coli* sensitive to, 1
  mutation and growth inhibition in *Aspergillus*, 207
Anderson, W. W., 225
Antigen, genetics of MuB1 in the mouse, 32
Aspergillus nidulans
  growth inhibition and mutation by acridines, 207
  nuclear distribution in heterokaryons, 185

Bacteriophage
  host-induced modification, 223
  restriction, 223, 273
Ball, C., 207
Bloom, Joyce L., 159
Bohren, B. B., 44
Bray, D. F., 122
Breeding systems in tetraploid *Rubus*, 245
Bristle-making in *Drosophila*, 295

Canalization, developmental, 303
Chaeta number, *Drosophila* selected lines, 96
Chlamydomonas reinhardii, genetic control of flagellar structure, 335
Chloramphenicol resistance, *E. coli* mutants, 281
Chromosome polymorphism in *Drosophila*, 149
Church, R. B., 383
Cinader, B., 32
Clines in frequencies of chromosomal types, 149
Clutterbuck, A. J., 185
Colson, C., 223
Control populations, variability of, 122
Coprinus lagopus
  gene suppression, 195
  somatic recombination, 235
Covariance, response to selection, 44
Cowan, J. W., 235
Crossing over in the mouse, somatic, 58
Curtailed, dominant T-allele in the mouse, 86

Datta, Naomi, 134, 141
Deol, M. S., 363
Dowrick, G. J., 245
Drosophila, interaction between polygenes, 96
Drosophila melanogaster
  bristle-making ability, 295
  genetic growth differences, 383
  inheritance of lymph proteins, 287
  selection for developmental canalization, 303
Drosophila pseudoobscura, genetic divergence, 225
Drosophila subobscura, chromosomal polymorphism, 149
Dubiski, S., 32
Duke, E. J., 287

Electrophoresis of *Drosophila* lymph, 287
Escherichia coli
  conjugation factors, 141
  host-induced modification, 223
  induction of invertant males, 353
  mechanical damage to Hfr cells, 267
  mutants
    chloramphenicol resistant, 281
    sensitive to methylene blue and acridines, 1
  physiological effects on host-controlled restriction, 273
  relation of RTFs to F, 134
Espardellier-Joset, F, 353
Esterase of sheep plasma, 373

F-factor of *E. coli*
  incidence of conjugation factors, 141
  relationship to RTFs, 134
Falconer, D. S., 159
Family size in control populations, 122
Fisher, K. W., 267
Flagella, genetic control of structure, 335
Fournier, R., 353
Frost, L. C., 169

Gene action, mode in circling mutants of mouse, 363
Genetic
  control of flagellar structure, 335
  control of esterase in sheep, 373
  divergence in experimental populations, 225
  effects on acridine mutation, 207
  growth differences in *Drosophila*, 383

Glover, S. W., 223, 273
Glutamic dehydrogenase in *Neurospora* revertants, 18
Growth
  genetic differences in *Drosophila*, 383
  heterokaryons of *Aspergillus*, 185
  inhibition by acridines in *Aspergillus*, 207
Grüneberg, H., 58

Haemoglobins, multiple in the mouse, 76
Heterokaryons, nuclear distribution, *Aspergillus*, 185
Hfr
  induction of invertant males, 353
  mechanical damage, 267
Hill, W. G., 44
Hopkins, J. M., 335
Host-controlled restriction, *E. coli*, 273
Host-induced modification, *E. coli*, 223

Inbreeding, restrictions in control populations, 122

Lamb, B. C., 169, 325
Latter, B. D. H., 313
Lee, R. M., 373
Lewis, D., 235
Lewontin, B. C., 295
Linkage
  antigen MuB1 and a complement defect in the mouse, 32
  intensity and population size under selection, 313
Loci, order on mouse X-chromosome, 130
Lymph proteins, inheritance in *Drosophila*, 287
Lyon, Mary F., 12, 130

Mating in *E. coli* impaired by agitation, 267
McNelly-Ingle, Caroline A., 169
McVittie, A., 335
Methylene blue, sensitive mutants of *E. coli*, 1
Meynell, Elinor, 134, 141
Morgan, D. H., 195
Morris, T., 12
Morton, J. R., 76
Mosaics
  for bristle-making in *Drosophila*, 295
  in rodents, 58
Mouse
  gene action in circling mutants, 363
  genetics of antigen MuB1, 32
  haemoglobins, 76
  mosaics, 58
  mutant, linkage group X, 159
  mutation rates at specific loci, 12
  new dominant T-allele, 86
Mouse—
  order of loci on X-chromosome, 130
  somatic crossing over, 58
Mutants, *E. coli*
  chloramphenicol resistance, 281
  sensitive to methylene blue and acridines, 1
Mutation
  acridines in *Aspergillus*, 207
  rates at specific loci in the mouse, 12

Neurospora crassa
  glutamic dehydrogenase in *am* revertants, 18
  polarized segregation, 325
  recombination frequency, effect of temperature, 169
Nuclei, distribution in *Aspergillus* hyphae, 185

Polarized segregation in ascomycetes, 325
Polygene interactions, 96
Polymorphism, chromosomal in *Drosophila*, 149
Populations, genetic divergence, 225
Population size and linkage intensity under selection, 313
Prevosti, A., 149

R-factor, interaction of chloramphenicol mutants in *E. coli*., 281
Randall, Sir John, 335
Recombination
  frequency, effect of temperature in *Neurospora*, 169
  somatic, in *Coprinus*, 235
Reeve, E. C. R., 281
Revertants, of *am* mutants in *Neurospora*, 18
Robertson, A., 44
Robertson, E., 303
Robertson, F. W., 383
Roper, J. A., 185, 207
RTF, relation to F-factor in *E. coli*, 134
Rubus, breeding systems in tetraploids, 245

Schell, J., 273
Searle, A. G., 86
Segregation, polarized in ascomycetes, 325
Selection
  asymmetrical correlated responses, 44
  for developmental canalization, 303
  population size and linkage intensity, 313
  regular responses, 96
Sheep, genetic control of plasma esterase, 373
Somatic recombination in *Coprinus*, 235
Sordaria fimicola, polarized segregation, 325
Spickett, S. G., 96
Stadler, D. R., 18

Sugino, Y., 1
Suppression in *Coprinus*, 195

Tetraploid breeding systems in *Rubus*, 245
Thoday, J. M., 96
T-region of mouse, new dominant allele, 86
Tribolium, variability in control populations, 122

Waddington, C. H., 303
Wardlaw, A. C., 32
Warr, J. R., 335

X-chromosome, order of loci in mouse, 130
X-rays, mutation rates at specific loci, 12

Young, S. S. Y., 295
